

CITPS Focuses on the “Two sessions”

The “Two Sessions” of China have just closed. The Outline Draft of the 14th Five-year Plan has been reviewed and discussed by the deputies to the Chinese NPC and the CPPCC members and also approved by the National People’s Congress. The Outline Draft has received an enthusiastic response among overseas Chinese and their companies.

This year is the first year of the 14th Five-year Plan which is the first five-year plan to fully realize the modern socialist country in an all-round way. It is an “affair of state” and an “affair of the enterprises” and also an “affair of our families.” We see from it new development opportunities and the red packets of the people’s livelihood that China is to throw in. This is our investment direction.

Canada International Trade Promotion Society (CITPS) and the local overseas Chinese will center on the objectives and missions regulated by the 14th five-year plan and cooperate with more trade organizations and institutions home and abroad in more diverse ways. We will organize specialty products, integrate market resources and innovate trade patterns and make a difference during the process of China’s construction of the new dual-circulation development.

Since the CITPS was appointed by the First CIIE as the BC and Yukon area organizer, we have, with the strong support from the Chinese consulate, BC government and friends from all walks of life, successfully organized teams to join three CIIE, which was approved by people from various sections. We also realized during the recruiting of exhibitors that CIIE is an excellent grafting opportunity. The first national level import expo in the world, it unites the home and abroad and makes use of both the domestic and international markets and two kinds of sources. Its “window effect” has been fully unfolded during the construction of new development frame. For the fourth CIIE this year, we will keep the pace and organize two exhibitor teams to join the CIIE together at the areas of food and agricultural products and medical products, focusing respectively on “organic food” and the “healthy Canadian life experience.”

We firmly believe that with strong leadership and practical system and the hard-working and united Chinese people as well as the support of the overseas Chinese who love the motherland, the 14th Five-year Plan will be realized. The Plan mentions that the country will expand the domestic demand and develop the domestic and international “dual circulation” framework. We will use the CIIE as a platform to actively lead and push forward the exchange and cooperation between the companies of the two countries and promote the Sino-Canadian economic and trade relation as stable and healthy.
